

DEPARTMENT OF REHABILITATION

General Benefits of LED Conversion

- Improved Safety and Visibility through enhanced optics and better CRI
- Increased Site Lighting with higher foot-candles, more consistency, and even controls
- Reduced Energy Costs by utilizing longer lasting and more efficient fixtures
- Lower Maintenance Costs as LED fixtures typically last for over 20 years
- Sustainability by lowering energy usage while minimizing light pollution
- Greater Asset Management through monitoring and metering capabilities
- Utilizing Controls to customize the lighting solution

Sample Project Highlights

Load Reduction: 178.94 kW	kW Hours Saved: 783,774 / Yr	Energy Cost Savings: \$70,000	Fixtures Installed: 153	Fixtures Eliminated: 22	Wattage Reduction: 68%
